

## Annex 1. Harmonized System - Product classifications and definitions for forest products

**Note:** The trade flow database system regularly looks up data from the UN Comtrade database from all countries that report data to COMTRADE, following the 6-digit codes in the following table. Commodity classifications change through time, and therefore it is important to note for which period a code is valid. The table comprises the codes of the Harmonized System versions as in use by member countries of the WCO in respectively 1992, 1996, 2002, 2007, 2012 and 2017. Each version is in principle in use until a next version comes into force, however not all countries immediately follow to make the switch to a new version. Initially the forest products trade flow database contains data from a previous calendar year, and all years going back to 2005. However, the system is in principle ready to compile data as far back as 1992. As the system already includes the new codes that will be into use as of 2017, the database should in principle be able to load comprehensive datasets until about 2022, when a new revision might be expected.
